NOTICE OF INTENT TO ISSUE A "PERMIT TO CONSTRUCT/OPERATE" PURSUANT TO RULE 212

This notice is to inform you that the South Coast Air Quality Management District (SCAQMD) has received an application for a Permit to Construct/Operate to install an emergency internal combustion engine driving an emergency generator at a location in your neighborhood. The SCAQMD is the air pollution control agency for all of Orange County and portions of Los Angeles, Riverside and San Bernardino Counties. Anyone wishing to install, operate, or modify equipment that could be a source of air pollution within this region must first obtain a permit from the SCAQMD. Rule 212 requires the applicant, for certain projects, to distribute a public notice prepared by the SCAQMD prior to the issuance of a permit. This notice is being distributed because the project will be located within ¼ mile of:

Granada Hills Charter High School located at 10535 Zelzah Ave. Granada Hills, CA 91344

The SCAQMD has evaluated the permit application for the following equipment and determined that the equipment will meet all applicable air quality requirements of our Rules and Regulations.

APPLICANT: Orchard Supply Company, LLC
APPLICATION NUMBER: 591415
LOCATION: 18060 Chatsworth Street, Granada Hills, CA 91344
PROJECT DESCRIPTION: Install an internal combustion engine driving an emergency electrical generator.

Orchard Supply Company is a hardware and gardening retail store. The proposed engine will drive an electrical generator that supplies power in case of an electrical emergency. The engine will be tested on a monthly basis for a maximum of 4.2 hours. Our calculations show that based upon a 30-day average a maximum of 0.01 lbs./day of carbon monoxide, 0.001 lbs./day of reactive organic carbon, 0.001 lbs./day of particulate matter, and 0.11 lbs./day of nitrogen oxides will be emitted from the project described above. Generally, the amount will be less as most emergency generator engines do not operate at their maximum potential. The engine operation will emit small quantities of some toxic compounds. The SCAQMD has evaluated the long-term (chronic) health impacts associated with the maximum potential emissions. Using worst-case conditions, our evaluation shows that the chronic health risk is well below our rule's toxic thresholds (below a Hazard Index of 1). According to the state health experts, a hazard index of one or less means that the surrounding community including the most sensitive individuals such as very young children and the elderly will not experience any adverse health impacts due to the toxic nature of these emissions. In addition, the long-term cancer risk from these emissions is below the SCAQMD risk threshold of one in a million.

The air quality analysis of this project is available for public review at the SCAQMD's headquarters in Diamond Bar. A copy of the draft permit to construct and operate can be viewed at <http://www3.aqmd.gov/webappl/publicnotices2/Search.aspx> by entering the company's name. Information regarding the facility owner's compliance history submitted to the SCAQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to SCAQMD, based on credible information, is also available from the SCAQMD for public review. Anyone wishing to comment on the proposed issuance of this permit should submit his or her comments in writing within 30 days of the distribution date shown below. If you are concerned primarily about zoning decisions and the process by which this facility has been sited at this location, you should contact your local city or county planning department. Please submit comments related to air quality to Mr. William Thompson, Senior Manager, Operations Team, Engineering and Compliance, South Coast Air Quality Management District, 21865 Copley Drive, Diamond Bar, California 91765-4178. For additional information, please call Mr. William Thompson at (909) 396-2398.

For your general information, anyone experiencing air quality problems such as dust or odor can telephone in a complaint to the SCAQMD by calling 1-800-CUT-SMOG (1-800-288-7664).

Subject: Emergency IC Engine
Application No: 591415

Craig Kimball,

The South Coast Air Quality Management District (SCAQMD) has completed the evaluation of your application for a Permit to Construct/Operate to install a new Emergency Internal Combustion Engine located at 18060 Chatsworth St., Granada Hills, CA 92064. According to SCAQMD Rule 212(c)(1), a 30-day public notice period must be completed prior to issuance of the Permit to Construct/Operate since the equipment will be located within 1,000 feet from the outer boundary of a school. The public notice must be distributed to the parents or guardians of children attending Granada Hills Charter High School located at 10535 Zelzah Ave., Granada Hills, CA 91344 and any other school within ¼ mile of the property line of your facility, and to each address within 1,000 feet of the property line of your facility.

Please contact the schools to arrange distribution of the public notice to the parents of the students. To accomplish the distribution, the school may choose to:

1. provide you the addresses of the students so you can mail the notices directly to the parents, or
2. mail the notices to the parents using the notices, envelopes and stamps that you provide, or
3. distribute the notices to the students to take home to their parents. You will need to provide the notices and envelopes.

For option 2 or 3 above, please provide the notices in sealed envelopes to the school for either mailing or distribution. The return address on the envelopes should be left either blank or be South Coast AQMD, 21865 Copley Drive, Diamond Bar, CA 91765-4178.

Enclosed is the public notice, which you are required to distribute per SCAQMD Rule 212(d) to the above-described addresses. **Prior to copying and distributing the notice, please fill in the actual date that the notice will be distributed at the bottom of the notice** and send a dated copy to the SCAQMD attention Arnold Peneda. Distribution of the enclosed notice should be completed by 2/24/2017

Proof of distribution should be submitted to the SCAQMD, attention Arnold Peneda by 3/3/2017 and shall include post office receipts, mail service receipts, distribution service invoices, or other methods approved by the SCAQMD. The document should reference application number 591415 and describe the boundaries of notification and/or addresses included in the distribution. If the notice was distributed by the school, a short letter (on school letterhead and signed by a school official) confirming distribution including the date of distribution needs to be included as part of this verification. All correspondence that you may receive regarding this notice must be forwarded to the South Coast Air Quality Management District, 21865 Copley Drive, Diamond Bar, CA 91765-4178, to the attention of Arnold Peneda, Air Quality Engineer.

The SCAQMD files pertaining to your above-described equipment will be available for public viewing at the SCAQMD Diamond Bar office during the public notice period -- Tuesday through Friday between the hours of 8:00 a.m. and 4:30 p.m. Should you have any questions, please call Arnold Peneda at (909) 396 - 2475.

Sincerely,

William C. Thompson, P.E.
